

YUSEF BARRY

Northern Virginia (Open to Relocate) | 347-982-6340 | yusef.barry3@gmail.com

PROFESSIONAL SUMMARY: Technology and intelligence leader with 12+ years across elite military service, enterprise security, and emerging technology assessment. USMC veteran — I operate with commander's intent: I assess, decide, and execute. I lead cross-functional engineering teams, synthesize complex data into executive insights, and deliver recommendations that move decision-makers to action. Active Top Secret Clearance.

LANGUAGES

English (Fluent) | Fulani (Fluent) | French (Advanced) | Spanish (Elementary)

TECHNICAL PROFICIENCIES & TOOLS

Systems: ILMS (Advanced) | Ariba (Advanced) | ServiceNow CMDB (Advanced) | Microsoft Office 365 | AWS | Google Cloud

Skills: Data analysis & visualization | Executive briefings & presentations | (PowerPoint/Keynote) | Custom reporting & dashboards | AI tools (ChatGPT, Perplexity AI, Claude AI, generative AI) | Procurement integration

Specialized: AI-native workflow optimization | Insight synthesis from complex datasets | Neuroscience-adjacent technology evaluation (neural devices, medical wearables, biometric systems)

PROFESSIONAL EXPERIENCE

U.S. Department of State | Arlington, VA

Program Manager, Technical Evaluations & Engineering Team Lead

Bureau of Diplomatic Security, Cyber & Technology Security Directorate (DS/CTS/TIE)

May 2022 – Present

- Lead a multidisciplinary team of Biomedical, Software, Computer, Network, and Radio Frequency engineers — directing complex technology evaluations without requiring step-by-step oversight. Teams are given intent, not scripts
- Apply a structured finding → insight → solution framework to every evaluation: assess emerging technology capabilities and limitations, synthesize data with operational context, and deliver recommendations to executive leadership — not data dumps, but decisions
- Evaluate neural stimulation devices (including Medtronic's Deep Brain Stimulator) and a range of emerging consumer hardware and connected technologies — many assessed without an existing framework — synthesizing FCC filings, white papers, and industry research into rigorous capability and risk profiles that inform executive decisions
- Build AI-enabled research and monitoring workflows leveraging generative AI to accelerate data collection, processing, and synthesis; operationalize repeatable audits tracking emerging consumer technology shifts across policy, hardware, and software changes, with outputs delivered as executive dashboards and decision-ready visuals
- Manage end-to-end client relationships across domestic offices and global posts, navigating complex multi-stakeholder environments to build trust, align priorities, and sustain long-term partnerships
- Deliver strategic advisory and technical guidance to cross-functional teams and senior executives on critical emerging technology, author and present briefings, memoranda, and evaluation reports to senior leadership
- Conduct software and hardware vulnerability assessments; develop mitigation strategies and produce Technology Evaluation Reports outlining findings, risk posture, and deployment recommendations

Custodial Officer & Technology Asset Manager

July 2022 – Present

- Designated custodial officer for a \$30M+ technology asset portfolio spanning domestic and international locations; manage the complete lifecycle from acquisition through disposal

- Redesigned the annual physical inventory process after identifying a critical accountability flaw; introduced a scalable verification protocol that standardized a complex process into a repeatable, employee-driven system
- Developed executive-level reports and presentations featuring visual analytics — graphs, tables, and dashboards — to communicate asset status and trends to senior leadership

TUNUVA Technologies | Chantilly, VA

Information Systems Security Officer — National Reconnaissance Office Contractor

June 2020 – May 2022

- Conducted comprehensive security assessments of IT systems; evaluated authorization packages and delivered risk-based recommendations to senior decision-makers under the NIST Risk Management Framework
- Translated complex technical findings into clear, compelling language for non-technical stakeholders and senior leadership — ensuring insight drove decisions, not confusion.
- Assessed hardware and software for organizational risk impact; authored detailed reports documenting findings and remediation roadmaps.
- Led cross-functional stakeholder meetings; applied structured risk frameworks to articulate tradeoffs and drive alignment under pressure.

INSIGHT GLOBAL | Springfield, VA

Inventory & Logistics Analyst — U.S. Army Intelligence and Security Command Contractor

December 2019 – June 2020

- Identified data integrity gaps in asset management systems; designed and executed corrective action plans that improved system reliability and reporting accuracy.
- Built custom data queries and visual reports — including graphs, tables, and trend analyses — to evaluate operational throughput and communicate findings to leadership.

United States Marine Corps | Multiple Locations Worldwide

Officer of Marines | Embassy Security Group | Infantry Section Leader

October 2011 – November 2019

- Operated in high-accountability environments requiring independent judgment, rapid execution, and disciplined decision-making with minimal oversight — not a trained behavior, internalized doctrine
- As Deputy Operations Chief (2019), managed \$30M+ in organizational assets, supervised administrative and logistical operations, and led unit readiness initiatives supporting U.S. diplomatic security missions
- As Deputy Detachment Commander in Kabul, Afghanistan (2018–2019), coordinated all administrative, logistical, and security requirements; selected for Secretary of State Pompeo's personal security detail during a diplomatic visit to India
- Trained 14 Marine Security Guards in Havana, Cuba, achieving a 20% improvement in unit physical fitness scores while ensuring strict compliance with all training standards
- Decorated for exemplary service: Navy & Marine Corps Achievement Medal (×3), Good Conduct Medal (×2), Afghanistan Campaign Medal, Humanitarian Service Medal, and Outstanding Volunteer Service Medal

EDUCATION & CERTIFICATIONS

- Georgetown University — M.S. Cybersecurity and Risk Management
- University of Maryland, Global Campus — B.S. Computer Network and Cybersecurity
- Park University — A.A. Criminal Justice Administration
- SANS Institute — Cybersecurity Risk Assessment | Risk Management and Compliance
- Stanford University — Advanced Cybersecurity Certificate
- Certifications: CompTIA Security+ (Active) | EC-Council Certified Ethical Hacker (Active)
